Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were Thomas A. Warden and Mary L. Fant. Trina J. Duffin and Shirley E. Brown provided word processing and table formatting support. Editorial support was provided by Jim Carlin, Research Information Branch, Information Division, Economics Management Staff. Data processing support was provided by Sharlan Starr and William Meiller, International Economic Systems Branch, Data Services Center.

ABSTRACT

This statistical reference summarizes current and historical data on U.S. foreign trade in agricultural products. Tables highlight commodity and country information, including values, quantities, principal markets for agricultural exports, and import sources.

SPECIAL NOTICE

This statistical report presents tables showing current and historical data on U.S. foreign trade in agricultural products. Commodity and country information is for the most recent 2-year period. Statistics for fiscal year 1988 are preliminary.

U.S. foreign agricultural trade statistics in this report were derived from official data released by the Bureau of the Census. Agricultural commodities are defined as (1) nonmarine food products and (2) other products of agriculture, such as fibers, raw hides and skins, fats and oils, beer, and wine, that have not passed through complex processes of manufacture. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in-transit through the United States from one foreign country to another when documented as such by the U.S. Customs Service.

Trade statistics for selected nonagricultural products, including fertilizer, fish, agricultural chemicals, farm machinery, and manufactured tobacco are presented at the end of the commodity group tables.

Exports

Export data include "exports of domestic merchandise," defined as commodities grown, produced, or manufactured in the United States, and commodities of foreign origin that have been changed from the form in which they were imported. The export value is generally equivalent to a free-alongside-ship (f.a.s.) value at the U.S. port of export, based on the transaction price including inland transportation, insurance, and other costs. Agricultural exports have been adjusted for transshipments through Canada based on information provided by the Federal Grain Inspection Service. More than 800 revisions have been incorporated into the 1987 and 1988 tables based on Census Bureau errata.

Imports

Import data are "imports for consumption," which include entries for immediate consumption and withdrawals from bonded Customs warehouses. The import value is defined as the "Customs value," based on the foreign market value, export value, or constructed value, and excludes import duties, freight, insurance, and other charges incurred in moving the commodity to the U.S. port.
